Summary

Full Stack Developer specializing in JavaScript, TypeScript, React, and Node.js. Proven experience in building production-grade web applications, implementing RESTful APIs, authentication workflows, and CI/CD pipelines within collaborative Agile environments.

Skills

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js (Express.js, NestJS), Django, RESTful API, Prisma

DB: PostgreSQL, MongoDB, MySQL

Tools: Docker, AWS, CI/CD, Git, AI tools (Claude Code, Cursor, Codex)

Work Experience

Full Stack Developer | [MediaJira](#)

01.2026 – 03.2026 · Sydney

Marketing campaign management and ad operations platform (ad delivery + marketing automation + task/approval and asset management).

- Built responsive user interfaces using **React (TypeScript)**, integrating **RESTful APIs** to deliver seamless end-to-end functionality.
- Developed backend services using **Python (Django)**, delivering production-ready features and improving system reliability.
- Designed and optimised relational data models using Django ORM with **PostgreSQL**, enhancing query performance and data integrity.
- Contributed to **CI/CD workflows** with Git-based pull requests, ensuring code quality through peer reviews and automated testing.
- Resolved production issues and improved system stability within an **Agile development** environment using Jira and structured workflows.

Software Engineer Intern | [Soon Meta](#)

11.2024 – 02.2025 · Melbourne

Full-stack recruitment platform supporting employer and candidate workflows.

- Developed responsive web applications using **TypeScript** and **React**, improving usability and code maintainability.
- Implemented back end **RESTful APIs** with **Node.js** and Express, ensured scalable content delivery and system reliability.
- Implemented backend data operations using **Prisma** with **MySQL**, supporting efficient data modeling and query management.
- Facilitated **CI/CD** workflows using GitHub Actions and Docker, automated testing and deployment.
- Contributed to maintaining **unit tests** and ensured automated test execution within **CI/CD pipelines** during pull request reviews.
- Troubleshooted production incidents and released patches to restore system stability.

Web Developer | [Xunyou Media](#)

04.2022 – 05.2023 · Qingdao, China

Custom enterprise software solutions for clients across multiple industries, delivering tailored system development and digital transformation services.

- Developed SPA using **React** and **JavaScript**, creating cross-device responsive UI following best practices and accessibility compliance.
- Built backend API endpoints using **Node.js** to support core business functionalities and efficient data operations.
- Integrated Ant Design components to develop internal management interfaces, accelerating feature delivery and ensuring UI consistency.

- Abstracted API request logic into reusable modules, standardizing frontend-backend communication and reducing code duplication.
- Translated design specifications into production-ready UI components, improving visual consistency and overall user experience.
- Deployed and maintained web applications on **AWS EC2**, supporting stable production hosting and system monitoring.
- Participated in code reviews and maintained Git branch workflows, supporting consistent integration across the team.

Education

Master of Computing and Innovation
The University of Adelaide

12.2023 – 12.2025
