PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience in React, Next.js, Node.js, and Prisma; skilled in building scalable web applications, integrating APIs, and implementing responsive UIs. Passionate about problem-solving, Agile development, and delivering high-quality software solutions. Strong experience in both academic and commercial projects, demonstrating technical leadership and collaborative teamwork.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript(ES6+), TypeScript (working knowledge), Three.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Prisma ORM, RESTful API, PostgreSQL/MySQL

Tools & Deployment: Git/GitHub, Docker, EC2/Vercel, npm/pnpm

Other: Agile Development, Problem Solving, Cross-cultural Collaboration

WORK EXPERIENCE

Software Engineer Intern

November 2024 – February 2025

Soon Meta

Remote

- Developed company backend management frontend pages using Vue.js, streamlining data visualization and user interface interactions for internal operations
- Built the blog module for JobABC website, including frontend pages with Next.js, backend CRUD operations with NestJS, and database management with Prisma and MySQL
- Gained hands-on experience in large-scale commercial project development and developed essential soft skills for effective communication with colleagues and management

PROJECTS

World Clock | *React, Styled components*

Jan 2024 – Feb 2024

- Developed a React-based world clock application with multi-timezone display functionality
- Implemented theme switching capabilities and modern glassmorphism design for enhanced user experience
- Created responsive UI components for seamless cross-device compatibility

Recipes Book | *React, Sass*

2024

- Built a comprehensive recipe management application using React with real-time editing capabilities
- Designed modern and intuitive user interface for efficient recipe browsing and management
- Implemented dynamic content updates and interactive features for enhanced user engagement

Login and Register System | *Node.js, PostgreSQL, Docker*

2024

- Developed a secure JWT-based authentication system with comprehensive login and registration functionality
- Integrated video streaming capabilities using Node.js backend and PostgreSQL database
- Containerized the application using Docker for improved deployment and scalability

EDUCATION

The University of Adelaide

Adelaide, SA

Master of Computing and Innovation

Expected December 2025

- GPA: 5.56 / 7 (Distinction-Credit average)
- Relevant Courses: Software Engineering & Project Management, Operating Systems, Secure Software Engineering, Computer Networks & Applications, Mining Big Data, Algorithm & Data Structure Analysis, Hot Topics in IoT Security, New Venture Creation
- MCI Project: Led full-stack development of a comprehensive academic research platform using React, Next.js, and Node.js; implemented secure authentication, efficient database operations, responsive and modern UI design, interactive data visualizations, and seamless API integrations; deployed the application on Sealos for scalable and containerized management, applying best practices in code organization, performance optimization, and user experience
- Project Management Foundation: Applied Agile principles to manage team projects, including task allocation, timeline tracking, and collaborative development
